## PROJECT EXPERIENCE

**Full-Stack Developer (Academic Projects) | 2024 – Present**

**Integrated Rental Booking System (Academic Project)**

- Developed full-stack Progressive Web App using MongoDB, Express, React, and Node.js
- Implemented JWT authentication and role-based access control
- Designed booking workflows with Redis-based locking to prevent double-booking
- Built responsive UI with Tailwind CSS and optimized performance
- Used Supabase for media storage

**Shopping PWA (Mentored–Guided Project)**

- Developed full-stack Progressive Web App using MongoDB, Express, React, and Node.js
- Implemented JWT authentication and RESTful APIs
- Integrated Redis caching to improve performance
- Built responsive UI and enabled offline support using PWA technologies
- Used Supabase for media storage

**IoT Health Monitoring Simulator (Academic Project)**

- Developed Python-based simulator for real-time health sensor data
- Integrated Microsoft Azure for cloud processing
- Visualized data using Power BI dashboards

## EDUCATION

**Coventry University | 2024 – 2026**

Bachelor of Science with Honours in Computing Science

**NCC Education | 2023 – 2024**

Diploma in Computing

## LANGUAGES

Burmese – Native
English – Fluent
Japanese – Intermediate
